ABOUT ME

Robotics and Artificial Intelligence undergraduate with hands-on experience in building robotic systems using microcontrollers and motors. Strong interest in automation, embedded systems. Looking to apply my technical skills in a practical, real-world.

EDUCATION

NMAMIT,Nitte| 2024-2027

BTech Robotics and AI

NTTF Belur Dharwad | 2021 - 2024

Diploma in Mechatronics

Kendriya Vidyalaya,Mangalore | 2021

10th

SKILLS

- ABB RobotStudio
- Embedded Systems
- PLC
- Pneumatics & Hydraulics
- Python
- Circuit Building
- CAD
- CNC G-Code
- Circuit Building

LANGUAGES

- Kannada
- Tulu
- Hindi
- English
- French

PROJECTS

CARENAV (6 DOF Robotic Arm & Mobile Robot Automated System) Autonomous Medicine Delivery Robot for Hospitals (Ongoing)

Developing CARENAV for B.Tech Major Project, focusing on SLAM, sensor fusion, AI, and autonomous coordination between a mobile bot and arm.

6 DOF Robotic Arm

JAN-APR 2026

Built and assembled a 6-DOF robotic arm for the CareNav project using NEMA 17 stepper motors with TB6600 drivers for precise motion control.

Aruco Marker-Based Localization and Navigation using Mecanum Wheel Robot

JUL - AUG 2025

Developed a vision-based control system for a Mecanum wheel robot using ArUco markers for real-time localization and autonomous navigation. Implemented computer vision with OpenCV in Python to detect multiple markers and estimate the robot's position and orientation.

6-DOF Robotic Arm Control using ESP32 and Blynk

APR – MAY 2025

Designed and developed a 6-DOF robotic arm controlled wirelessly using an ESP32 and an IoT mobile interface. Implemented real-time servo control through a PCA9685 PWM driver over I2C communication, enabling precise multi-joint movement via Blynk app.

Differential Drive Robot Navigation with ArUco Marker

APR 2025

built a robot that can detect and navigate toward a target using visual cues through ArUco markers. This project combined computer vision and motion control.

Smart Portable Automatic Inverter

JUL 2023 – APR 2024

Final Year Project: Developed a smart portable automatic inverter with Wi-Fi connectivity and Amazon Alexa integration for voice-controlled operation. The system enables automatic power switching, overload protection, and remote control via a mobile app.

ACHIEVEMENT

NOCN CERTIFICATION
Dec 2024

NOCN Level 5 Diploma in Mechanical Engineering (Mechatronics and Smart Manufacturing)
